Private Sewer Lateral Loan Program

Updated January 2021

Thank you for doing your part to help us protect and preserve our environment by replacing your privately-owned sewer lateral. Nearly 50% of all sewer spills are caused by leaks in privately-owned lateral pipes. By allowing Sanitary District No. 2 (SD2) to assist you with this project, together we will:

- Reduce contamination in our community and waterways
- Reduce treatment costs for the entire District
- Increase the value of your home

Private laterals are the responsibility of the property owner, from the building to and including the connection at the District main line. The Private Sewer Lateral (PSL) Loan Program was designed to encourage property owners like you to repair or replace your lateral pipes and help to protect our environment.

The District offers low interest **loans up to \$25,000** to replace your private sewer lateral. Repayment of loans will be over a period not to exceed ten (10) years at an **annual interest rate of 3.0%**. Payments will be collected through the semi-annual property tax bills as a special assessment.

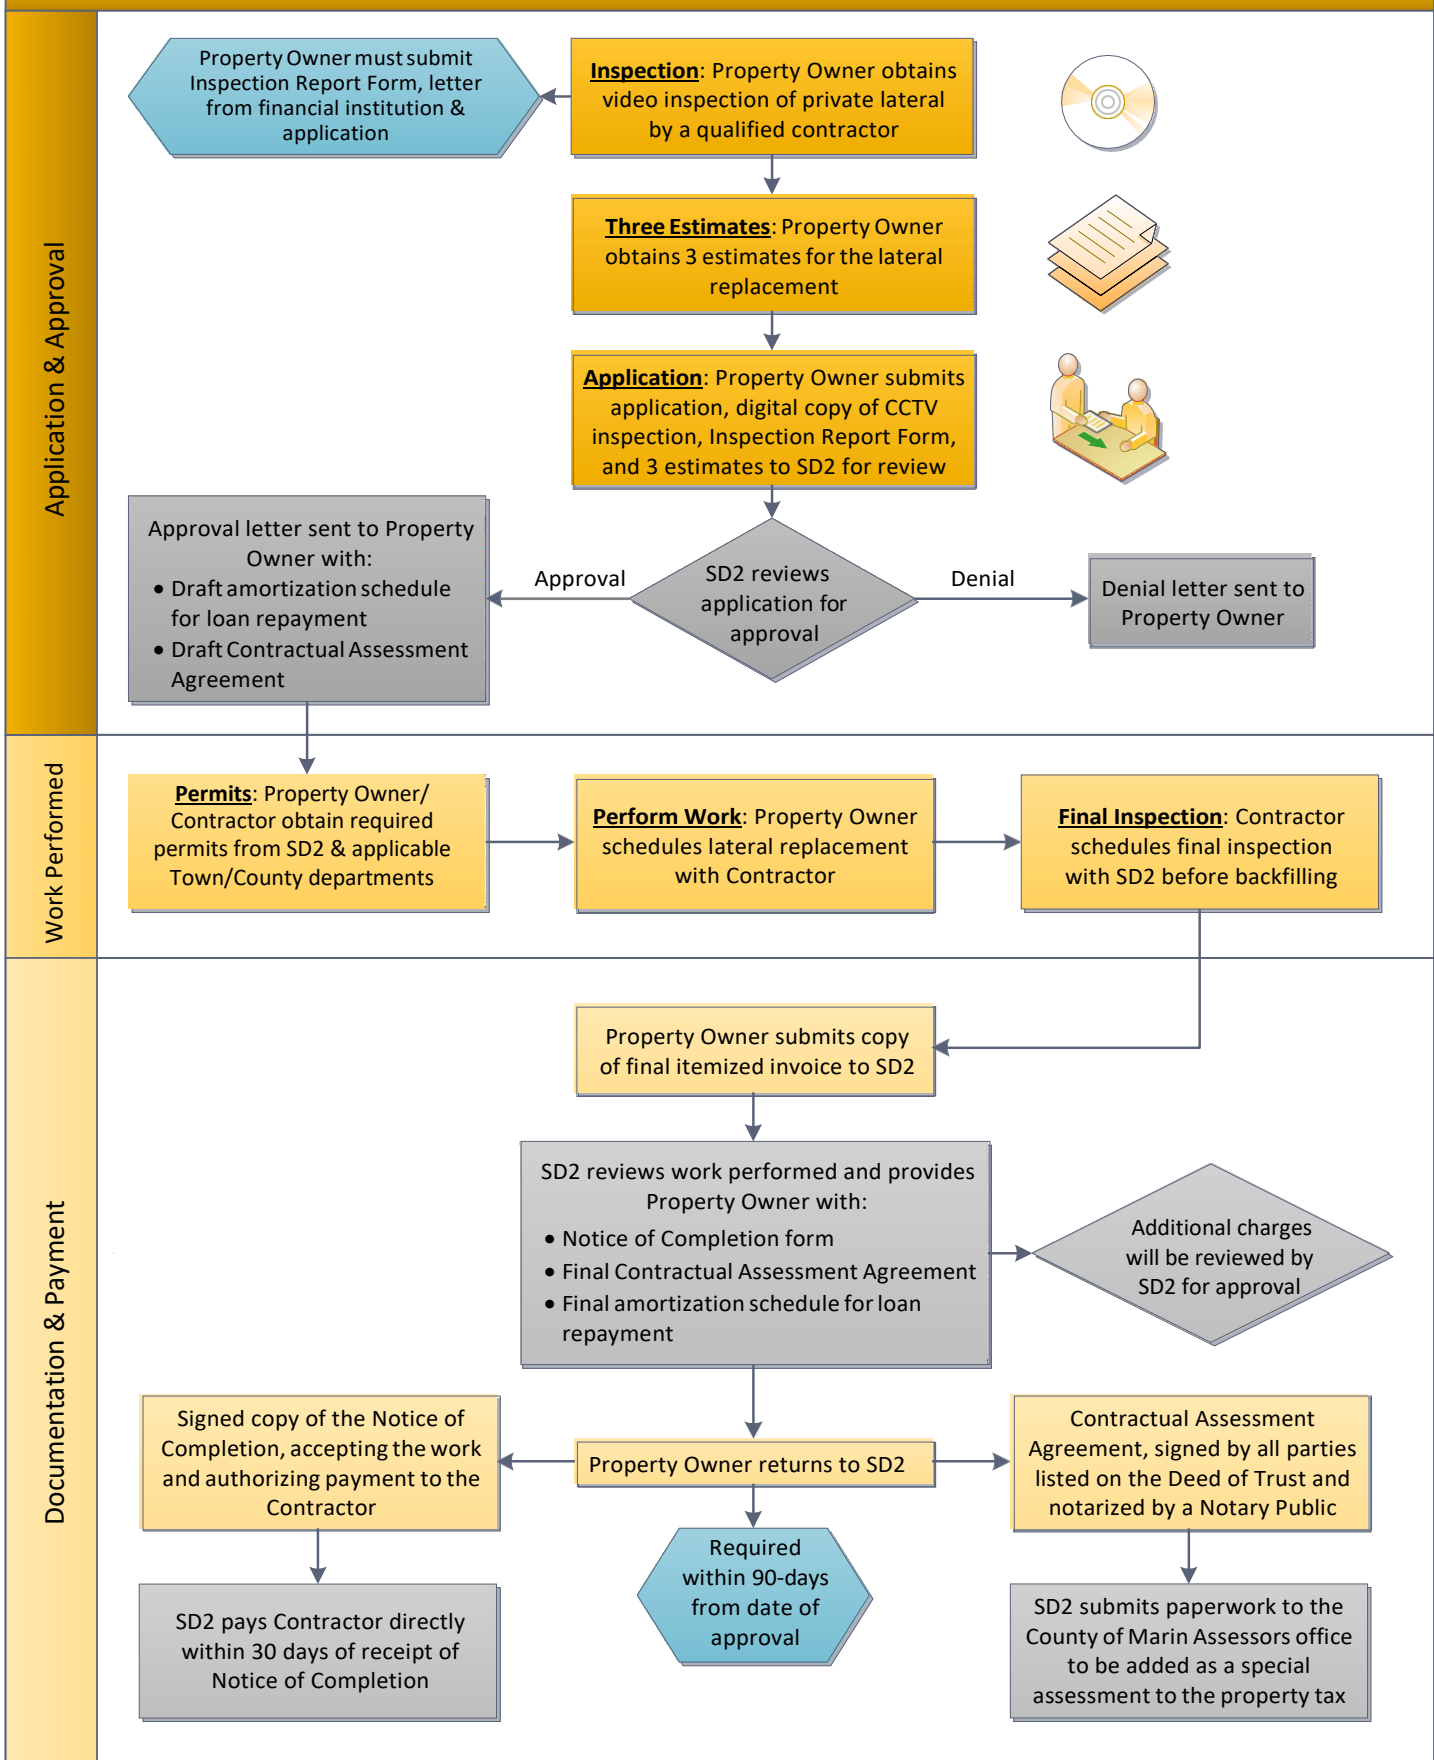

The following requirements are necessary to apply for the SD2 PSL Loan Program:

1. Signed PSL Loan Program application (available at <https://tinyurl.com/y3ryskf6>),
2. A digital copy of the Closed Circuit Television Video (CCTV) inspection performed by a licensed contractor
CCTV must be within a year from date of application
3. Completed Sewer Lateral Inspection Report Form
4. Three (3) lateral replacement bids from a qualified contractor
Bids must be within 90 days from date of application
5. Written confirmation from a financial institution stating that the property owner does not qualify for a private loan

District staff will review your application and notify you about the status of your loan application, usually within ten (10) working days. District staff will provide loan funding based on the lowest qualified bid. However, the property owner can choose whichever contractor they'd like to work with. If the application is approved, the property owner will be required to sign a Contractual Assessment Agreement, which will be recorded against the property.

A flow chart of these steps, the Inspection Report Form, the loan application and a list of pre-qualified contractors is included in the pages that follow. Contractors who are interested in being added to SD2's pre-qualified contractors list should contact SD2 staff. Many contractors already understand the program and can assist you in the application process. If you have questions about the loan program, feel free to call or email us using the contact information above.

Private Sewer Lateral Inspection Report Form from Homeowner

This form must be completed by the Property Owner and submitted with the application for the Private Sewer Lateral Loan Program. The Property Owner is responsible for ensuring that the contractor conducting the video inspection meet the following requirements:

1. Contractor shall hold either: An A, B, C-36 or C-42 license with the California Contractors State License Board or National Association of Sewer Service Companies Pipeline Assessment and Certification Program (NASSCO PACP) certification,
2. Contractor should have an active business license,
3. Video must clearly verify the property address of the lateral being inspected,
4. An audio recording describing all issues with the lateral being inspected along with a footage counter to show length of pipe **MUST** be included as part of the inspection report,
5. All reasonable efforts must be made to fully inspect the entire lateral, including cleaning and removal of obstructions,
6. Any lateral tie in connections need to be inspected and their source identified.

NOTE: Applications that do not include this form will be rejected. Digital copies of CCTV inspections that do not meet the above requirements will be rejected. Incomplete video inspections, where reasonable efforts to clear the lateral were not made, will be rejected.

How many properties does the lateral serve? <input type="checkbox"/> Only one <input type="checkbox"/> Multiple (If multiple, provide property information)
--

THIS SECTION MUST BE FILLED OUT: A backwater device is required on every property where any outlet or trap of the private sewer lateral is below the level of the nearest manhole. A check valve or grinder pump may also be required.

Property has a Popper valve/backwater device which is working properly.
 Property needs a Popper valve/backwater prevention device installed or repaired.
 Property already has a check valve/grinder pump installed w/ Alarm.
 Property needs a check valve/grinder pump installed.

I certify that the Property has been inspected and to the best of my knowledge, the sewer lateral has no outdoor drain connections including sump pumps, roof gutters, foundation drains, heat pumps, etc.

Private Sewer Lateral LOAN Program Application

By signing this application, I certify that I am the legal owner of the property described herein. I am aware the submission of this document does not constitute that a loan has been approved by the District. I have read the documentation discussing the requirements for the Private Sewer Lateral Loan Program and am aware that a letter will be issued advising if funds have been approved.

I understand that any repair work performed prior to receiving a letter of approval from the District will not be eligible for a loan.

If approved, loans will be obligated for a period not to exceed ninety (90) days. **I understand that all repair work, inspection(s), and the Contractual Assessment Agreement must be completed and submitted to the District within this ninety (90) day period.**
